

Mini Project

Rawlabs Academy

Office **Booking** System

Goals : Develop mobile-based platform to **rent coworking spaces** at **Rawlabs Space**. This application aims for the **convenience** of user when looking for a suitable working space at **Rawlabs Space**. It is also important for the business to manage its **listings, customers, and marketing** for managerial purposes.

Project **Scope**

The application will include customer apps to view listing and book a working space. Also **backend** has admin portal to manage working space via **postman**. Customer **only** can rent for working hour (**8 a.m to 5 p.m**)

User details :

- Customer / Buyer
